

Woman Worn Out

Sue E. Armstrong

To ensure their safety, females should not be placed in mixed sex psychiatric wards with males

We are advocating for the reinstatement of female only psychiatric wards, Australia-wide and internationally in private and public sectors

The same issues arise in Alcohol and Other Drugs rehabilitation - which should also have female only services

Our Broader aims

- **To improve knowledge of female psychiatry and female mental illness issues in the community**
- **For all people to treat females with mental illness issues with kindness, dignity, and respect**

You may care to explore our website and view our films, short version (8 minutes) full version (46 minutes) explaining this important project
